

PolyPattern

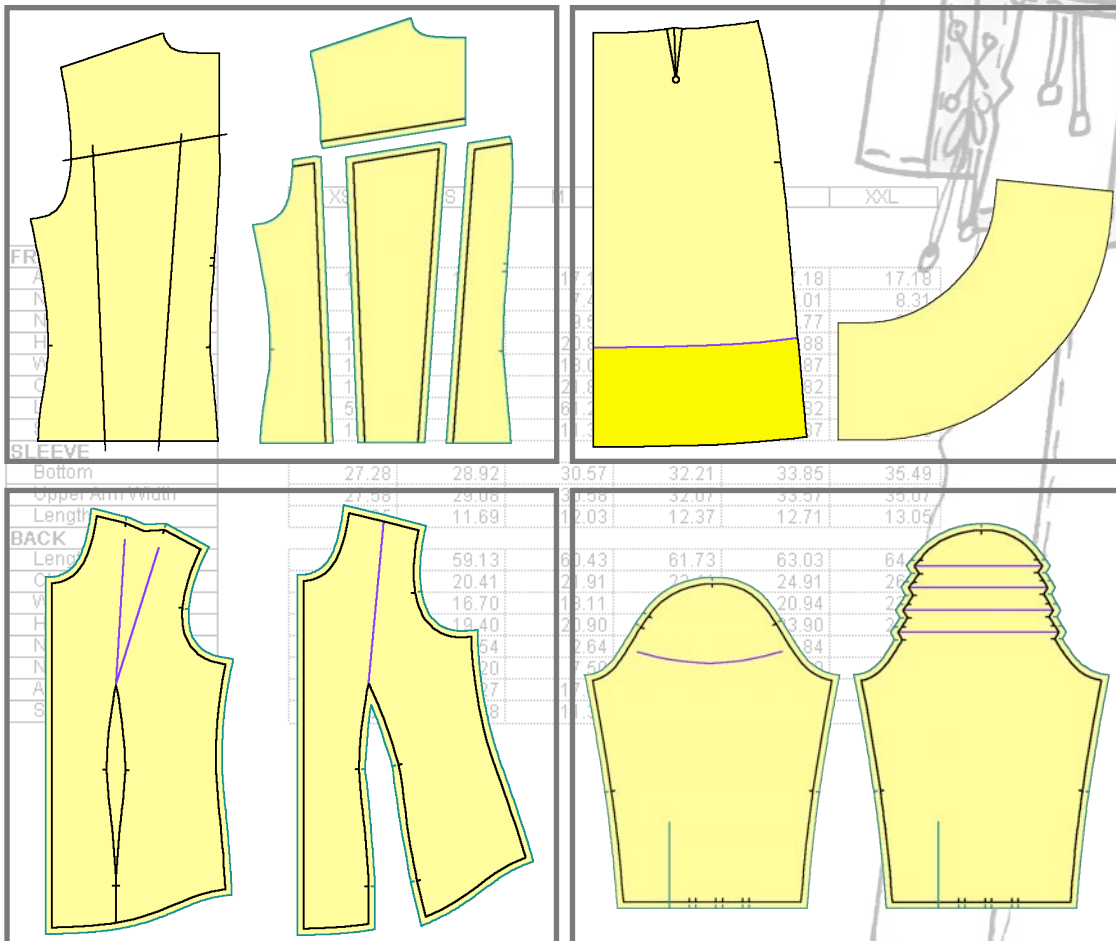

Simple, but not Simplistic

Complex, but not Complicated

PolyPattern-Design is the core of PolyPattern pattern construction and grading software. Its high performance, intelligent tools, and accessible functionality make it the perfect tool to easily make patterns directly on screen. Organizations with a large number of complicated patterns can make themselves even more productive with the additional functionality provided by PolyPattern-Design Pro.

PolyPattern-Design Pro

PolyPattern-Design Pro is an extension of PolyPattern-Design. It includes all of its features, plus special tools for doing more advanced pattern construction in even fewer steps, yielding geometrically correct patterns in every operation.

Design Pro

PolyPattern-Design Pro features include:

- ☑ automatic opening of any type of pleat, dart, or pleated dart
- ☑ automatic dart definition, reversal, shifting, and cut out
- ☑ edge walking to determine the "fit" of two pieces
- ☑ the ability to fold a pattern across a line or to bring two points together
- ☑ the ability to extract a pattern from drafted lines
- ☑ tools to create accurate single or double spiral shaped patterns for flounce
- ☑ tools to quickly open multiple pleats with an option to smooth into volan or ruffle pieces
- ☑ tools to keep pattern dimensions in a dimension table that reflects and subsequent changes you make
- ☑ tools to define complex matching criteria for plaid and stripe matching in the marker
